```

# PROBLEM 31

In England the currency is made up of pound, £, and pence, p, and there are eight coins in general circulation:

1p, 2p, 5p, 10p, 20p, 50p, £1 (100p) and £2 (200p).

It is possible to make £2 in the following way:

**1£1 + 150p + 220p + 15p + 12p + 31p**

How many different ways can £2 be made using any number of coins?

```
let rand i = (new System.Random()).Next(i)
```

```
let removeIndex i list =
```

```
let rec removeIndex = function
```

```
| [] -> []  
| hd :: tl -> tl
```

```
let rec pairs index fn = function  
| [] -> []  
| hd :: tl -> (hd, List.nth tl index) :: pairs index fn (removeIndex index tl)
```

```
let index = index_fn(tl)
```

```
(hd, List.nth tl index) :: pairs index_fn (removeIndex index tl)
```

```
let rec pairs index_fn = function
```

```
| [] -> []  
| hd :: tl ->
```

```
let index = index_fn(tl)
```

```
(hd, List.nth tl index) :: pairs index_fn (removeIndex index tl)
```

```
let rand i = (new System.Random()).Next(i)
```

# LÖSNUNGSPRESENTATION
